

Chapter 90. Division of Measurement Standards.

Article 1. Testing Equipment.

17 AAC 90.045 is amended to read:

17 AAC 90.045. Testing equipment. (a) The director may require owners of weighing and measuring devices, and persons and companies that perform service to weighing and measuring devices, to

(1) supply calibrated field standards of sufficient size and capacity; and

(2) make these standards available on-location in order to perform device testing.

(b) If the director believes that standards or testing equipment are inaccurate, the director shall require the testing and certification of those standards and testing equipment. (Eff.

AS 45.75.050 AS 45.75.080

Article 4. Commodities.

17 AAC 90 is amended by adding a new section to read:

17 AAC 90.618. Retail sales of refined petroleum products. All refined petroleum products, including all product blends of gasoline and diesel fuel oils, delivered from a retail motor fuel dispenser or a meter with a maximum rated flow rate of less than 100 gpm, shall be

sold on a gross volume basis. Volumetric measurement of the product may not be temperature compensated, or adjusted by any other factor. (Eff. ____/____/_____, Register _____)
