JUNEAU - 2ND STREET
DEMOLITION/PARKING LOT
PROJECT NO. R-30167 (68771)

WORK SUMMARY

THIS WORK SHALL CONSIST OF:

1. Removal and satisfactory disposal of one (1) wood frame structure (known as the Empirez Bldg.).
2. Disconnection of utilities.
3. Cleaning, grubbing and clean up work.
4. Earthwork to construct a parking lot.
5. Placement of barrier guardrail.
6. Placement of curb, gutter and sidewalk.
7. Sidewalk seeding.
8. Asphalt paving and striping.

* These items shall be completed in 30 calendar days, all remaining work shall be completed by June 11, 1966.
**DRAINAGE OUTLET DETAIL**

- 5"x8½" checkered cover R
- Concrete still box, see detail 5
- Field fit to length required for connection to inlet box

---

**DRAINAGE INLET BOX**

- 30" elbow for 12½ CMP
- 1½" x 37" bottom R

---

**CONCRETE STILL BOX DETAIL**

- 12½ CMP inlet
- 3½" steel pipe (steel)
- 3½" steel pipe (steel) (OUTLET)

---

**TYPICAL X-SECTION**

Vertical = 1" = 5'-0"
Horizontal = 1" = 10'-0"

---

**GUARDRAIL DETAIL**

- 1½" x 2½"
- Timber curb & all dip joints to be sealed to asphalt (use fast coat material) Spacers to be located on center of guardrail post

---

**TYPICAL X-SECTION**

Vertical = 1" = 5'-0"
Horizontal = 1" = 10'-0"
Typical X-Section

Sidewalk Transition Detail

Expansion Joint

Dummy Joint

Notes:
1. Sidewalk expansion joints shall be opposite expansion joints in adjoining curb and gutter and of 30 nominal spacing. Dummy joints shall be equally spaced between expansion joints—spacing shall not exceed 6" unless otherwise noted.

2. Pre-molded expansion joint material minimum ½" thickness shall be placed longitudinally where sidewalk abuts concrete structures, curb & gutter, existing sidewalk, etc.

Sidewalk Joint Details

Planter Box Detail

Frame & Grate Detail

Section: A-D

Notes:
Substitution to commercially available frame & grate is allowable. Subject to Project Engineer's approval.
