**GENERAL NOTES**

1. A comprehensive network of survey control monuments was established prior to the construction of the U.S. Coast Guard Lightship U.S.S. 1568 and U.S.S. 1852 projects in the Anchorage Valley area.

2. The project did not affect any existing or proposed control or survey monuments established by the U.S. Coast Guard. The U.S. Coast Guard is responsible for protecting and maintaining their control monuments.

3. The original control monuments of the U.S. Coast Guard were relocated to accommodate the construction of the U.S. Coast Guard Lightship U.S.S. 1568 and U.S.S. 1852 projects. The relocated control monuments are located on the property of the project.

4. All survey control monuments on the project property are accurately located and the coordinates of the monuments are recorded in the U.S. Coast Guard's official survey control record. The U.S. Coast Guard is responsible for the maintenance and protection of their survey control monuments.

5. The U.S. Coast Guard will relocate any survey control monuments on the project property in accordance with the plans and specifications of the project. The U.S. Coast Guard will provide the necessary information to the project owner for the relocation of the survey control monuments.

**HORIZONTAL CONTROL**

Horizontal control is established by a network of survey control monuments located at the U.S. Coast Guard Lightship U.S.S. 1568 and U.S.S. 1852 projects. The coordinates of the control monuments are recorded in the U.S. Coast Guard's official survey control record. The U.S. Coast Guard will provide the necessary information to the project owner for the establishment of the horizontal control network.

**PROJECT MANAGEMENT**

The project management will be performed by the U.S. Coast Guard's project management team. The project management team will provide the necessary information to the project owner for the establishment of the horizontal control network.

**SURVEYOR'S CERTIFICATE**

I hereby certify that the project was accurately surveyed and constructed in accordance with the plans and specifications of the project. The surveyor is responsible for the accuracy of the survey control monuments and the horizontal control network.
