

## Section 4(f) Detailed Identification Not Required Screening Form

*This form may be used during consultation with the NEPA Program Manager in support of a determination that a project has a low probability of having a Section 4(f) use and detailed identification is not required, outlined in Section 8.4.4 of the Alaska DOT&PF Environmental Procedures Manual.*

Project Name:

State Project #:

Federal Project #:

Project Description:

*Examples of project activities that may be considered to be low risk of having a Section 4(f) use include reapplying pavement markings, crack sealing, light bulb replacement, guardrail replacement, bridge painting, sign replacement, and other similar activities.*

Project consists exclusively of these activities: Yes      No

---

Discussion of why the project and associated activities have a low probability of a Section 4(f) use:

General assumptions and conditions:

- Section 106 consultation is complete and documentation is included with this form.
- REM recommends this determination.
- All work is in existing right-of-way.
- No permanent or temporary occupancy of a Section 4(f) resource, if they were present, is required.
- Access to adjacent Section 4(f) resources, if they were present, will not be impacted.
- No other constructive uses including noise, vibration, aesthetic, or ecological could reasonably occur.

*If using this form, it must be submitted to the NEPA Program Manager via email and the NEPA Program Manager must provide a determination response before Section 4(f) consultation is considered complete. Any changes to the project activities require an updated consultation with the NEPA Program Manager.*
