STEEL GREY IS THE NEW GREEN.

You know that a 100-year service life for steel is attainable, but did you know that corrugated steel pipe (CSP) is also the greenest drainage product on the market? Steel has the highest recycle content and requires less energy to produce and to install, and you can earn LEED certification points. Today's steel allows you to specify it for all the right reasons with confidence.

To get the facts on the durability and sustainability of today's CSP and more, visit www.RealDealOnSteel.com.

100-year service life • 100% traceable • 100% recyclable

Introducing Pipe from ADS

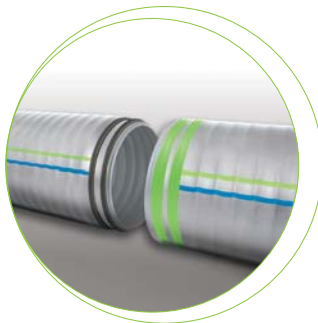

A new addition to our proven N-12 product line, N-12 HP (High Performance) combines advanced polypropylene resin technology with a highly engineered, triple-wall profile design for superior performance that far surpasses other traditional pipe products currently offered.

APPLICATIONS:

Sanitary sewer systems

High performance drainage installations

Gray water transmission

DOTs + FHWA + AMRL = CONFIDENCE

AMRL works to develop quality in materials testing laboratories so you can have confidence in the results.

AMRL continues to develop new tools to serve your needs. Find out what we're doing now, and let us know what you would like to see in the future. We're here to serve you.

For more information,
contact ADS at 800-821-6710
or visit www.ads-pipe.com
